## Timeline for Expanded Services

### VA Plan for Expanded Health Care Services

By 2013, VA will offer an array of expanded outpatient services to Salisbury-area veterans.

In keeping with the VA model for quality care and enhanced access to needed services in proximity to where the majority of veterans reside, VA will develop Health Care Center Facilities (HCCFs) in Charlotte & Winston-Salem.

VA will double the capacity of its current clinic in Hickory.

All current inpatient medical/surgical and emergency department services at Salisbury will be maintained during the transition period. Salisbury VA will establish state-of-the-art centers for Mental Health and Long-Term Care, while maintaining a full range of outpatient services.

	Currently Available	By December 2010	By December 2013
